

Take the Magic Home

Our little beanstalk is ready for its next adventure!

Your child has been watching a bean plant grow at school as part of our *Harper and the Sunflower Stalk* story experience. Their climbing picture has been traveling upward with the vine - and now the beanstalk is coming home!

Help the Beanstalk Keep Growing

- **Find a sunny spot.** Place the cup near a bright window.
- **Check the soil.** Add a little water when the soil begins to feel dry. The soil should be damp, not soggy.
- **Guide the vine.** As it grows, gently wind the vine around its stick or support.
- **Keep watching.** Notice new leaves, measure the plant, or draw a picture of how it changes.

Keep the Storyland Magic going!

Ask your child: *How has your beanstalk changed? What do you think it needs to keep growing?*
If your beanstalk could climb all the way into the clouds, where do you think it would lead?

A Little Magic Can Make a Big Difference

Harper learns that even someone small can make a big difference. As you care for the beanstalk together, talk about one small thing your family could do to help an animal, a neighbor, or someone in your community.

Thank you for helping the adventure continue at home!

Storyland Magic - where stories become experiences.
